

# **Mohammad Rahimi**

PhD Student

Business Information Technology

Virginia Tech

# **Expertise or Research Focus Area:**

- Conversational AI / Large Language Models (LLMs) / Chatbots
- Artificial Intelligence in (Mental) Healthcare
- Behavioral Nudges in Healthcare
- Overarching Themes (1 or more present in every project):
  - Digital (Mental) Health
  - Health Disparities / Equity
  - Social Justice / Social Good

# Partnership Interests:

- I am highly interested in connecting with practitioners (e.g., psychiatrists and psychologists) and industry partners to learn and facilitate engaged scholarship
- I am in dire need of access to real-world populations (i.e., mental health clients) for research purposes with the ultimate goal of improving patient outcomes.
- I would appreciate being informed about relevant funding opportunities at VT and beyond.
